Running an eDocfile Program as a Service

Running an eDocfile program as a service **is not supported** as the programs were not written as a service; however, following these instructions should allow most eDocfile programs to load as a Service on XP and Server 2003. On Vista they most likely will not work because of desktop intervention.

The steps below were tested on XP Professional and they worked properly, however, no support will be provided for setting any program up to run as a Service.

Begin by downloading Launcher Service at:

http://emutastic.emulation64.com/netosoft/downloads/LaunchServ_0.2.zip.

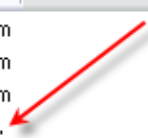

This is a free program that will load anything as a service and it is easy to setup and use. Once downloaded, unzip the files and place them in C:\Services. There are complete detailed instructions for using Launcher Service in the file C:\Services\Readme.txt.

Shown in this example will be setting up Blank Page Splitter to run as a service. The setup will begin by editing the file C:\Services\LaunchServ.ini to this:

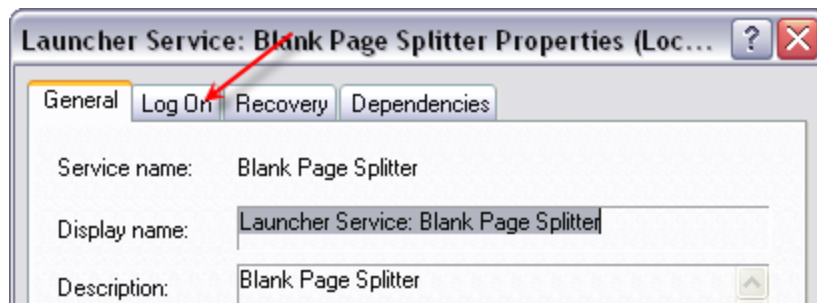

```
Name = Blank Page Splitter
Description = Blank Page Splitter
Executable = "C:\Program Files\edocfile\Blank Page Splitter\BlankPageSplitter.exe"
WorkDir = "C:\Program Files\edocfile\Blank Page Splitter"
RestartTimeMin= 30
ExecAtStart=""
ExecAtStop=""
ExecTimeMax= 20
CheckInternet = 1
CheckHibernation = 1
StopAndRun = 0
CleanTmp = 1
SingleInstance = 1
Interactive = 0
Special1 = 1
```

Once finished double click on "C:\Services\Install Service.bat" and then Open Control Panel, Select Administrative Tools and Services.

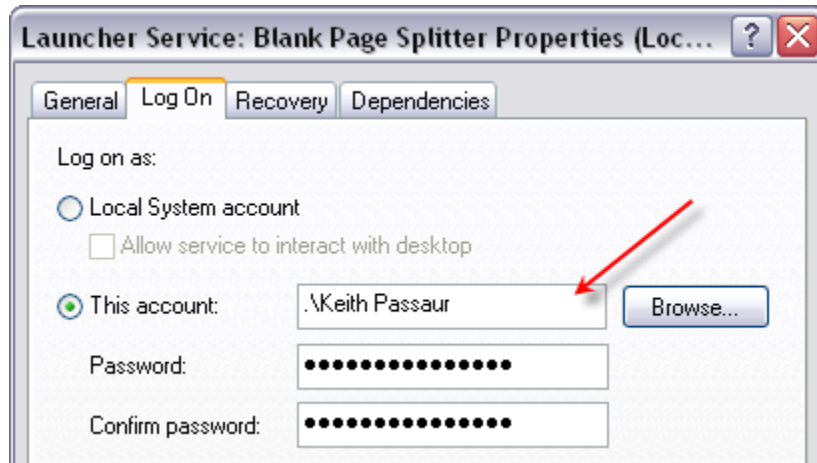

Name	Description	Status	Startup Type	Log On As
iPod Service	iPod hardw...	Started	Manual	Local System
IPSEC Services	Manages I...	Started	Automatic	Local System
Java Quick Starter	Prefetches...	Started	Automatic	Local System
Launcher Service: ...	Blank Page...		Automatic	.\Keith Pa...

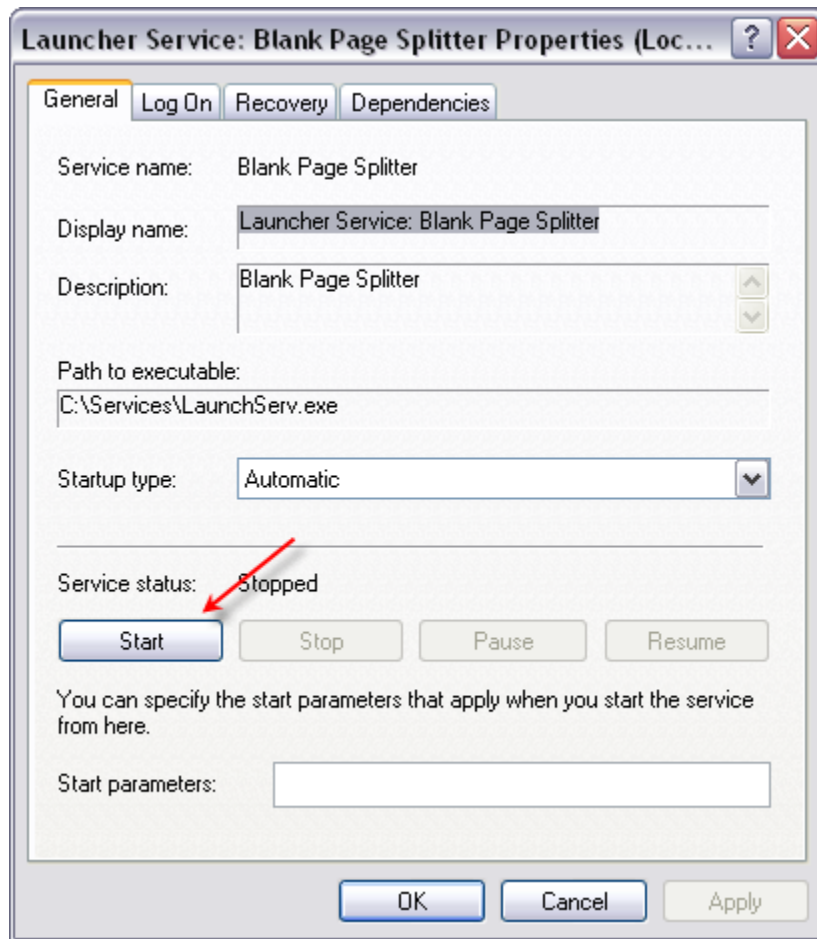

Double Click on Launcher Service to open it.

Click on the Log On tab

Place a check mark in button "This account" and enter the account information of the user that installed the program. When finished click on "Apply" and then the "General" tab.

Click on "Start" and the program will load, once finished click on "OK" to exit.
